

# OFF SITE REPAIRS

## Mechanical Engineering and Consulting

GHS Solutions' Off Site Repair Service (OSR) provides mechanical engineering and consulting services, incorporating precision workshop machining; and fitting assemblies for the mining, oil and gas, agricultural, marine, manufacturing and service industries. With over 60 years combined experience, the GHS Solutions' OSR team offers quality controlled, value added, economic solutions, within agreed delivery timeframes.

Through GHS Solutions accredited system of management to ISO 9001:2008, OSR's quality control of products and services extends from procurement through to client delivery. With excellent open communication, transparency, high reporting standards, GHS Solutions can be relied upon to document the fabrication or repair performed by OSR. An example of this is the refurbishment and precision balancing of dust extraction fans to a balancing grade quality of G2.5. Through this process GHS Solutions documents the life cycle of the fan, delivery to our premises, inspection test reports, the quotation processes, procurement processes with accredited suppliers, repairs, balancing, continuous test environment reports and finally delivery to the client.

Quality outcomes are only achieved through our state of the art workshop and clean room environment. Our OSR team treats your assets like our assets through proprietary identification procedures and the continual reporting process to you, our valued client.

- /// Mechanical Engineering and Consulting Services
- /// Precision Machining up to 300mm Shaft Diameter
- /// Preventative Maintenance and Machine Condition Monitoring
- /// Gearbox & Pump Overhaul and Refurbishment to OEM Standards
- /// Industrial Balancing for Fans, Rollers, Drums, Shafts, Pumps, Electric Motors and Armatures
- /// Fabrication Pulleys, Head Drums, Tail Drums, Rollers up to 850mm Diameter
- /// Warman Barrel & Pump Assemblies

READY / RESPONSIVE / RELIABLE
