

PLASTICS DIVISION

Poly Welding, Pipeline & Fabrication Services

GHS Solutions' Plastics Division has been servicing the mining, oil and gas, agricultural and marine industries since May 2001. With over 50 years combined experience, a reputation for reliability and dependability, the GHS Solutions' Plastics Division team offers quality controlled, value added, economic solutions, within agreed delivery timeframes.

Through GHS Solutions accredited system of management to ISO 9001:2008, our Plastics Division's quality control of products and services extends from procurement through to client delivery. With excellent open communication, transparency, high reporting standards, GHS Solutions can be relied upon to document any fabrication or repair.

Quality outcomes can only be achieved through our state of the art workshop and mobile workshop capabilities. We offer full workshop fabrication services producing tanks, pipe supports, hoppers, bunds, manifolds, strainers and knife gates, in addition to complete system field installations incorporating the welding of polyethylene pipeline anywhere in Australia.

As part of the GHS Solutions Engineering Division, we provide custom solutions to fabricate and transition our plastic works between all materials, be it steel, stainless steel and aluminium, concrete or similar.
