

ENGINEERING & FABRICATION

Fabrication and Site Requirements Covered

GHS Solutions' Engineering and Fabrication Division provides drafting, design, certification, fabrication, site installation and decommissioning solutions for the mining, oil and gas, construction, marine, manufacturing and service industries. Descending from one of the oldest engineering businesses in Geraldton, established for over 60 years, the GHS Solutions' engineering team offers quality controlled, value added, economic solutions, within agreed delivery timeframes.

Through GHS Solutions accredited system of management to ISO 9001:2008, the quality control of products and services extends from design, through procurement, fabrication to client delivery. With excellent open communication, transparency, high reporting standards, tradesmen certified to accredited welding procedures, GHS Solutions can be relied upon to document any fabrication, repair or project.

We also provide turnkey solutions through a team of experienced mechanical engineers, structural engineers and project managers, able to design and implement your next project to our exacting standards. Safe and environmentally responsible outcomes are only achieved through documented policies and procedures externally certified to ISO 14001:2004 and AS/NZS 4801:2001.

Through internally maintained Health, Safety and Environment Site Management Plans, GHS Solutions can provide safe, responsible rapid deployment of our professional workforce to any site in Western Australia.
