

# Scaffolding Solutions

## Accessing Your Needs

Established in 1990, GHS Solutions Scaffolding Division is one of the most experienced and established scaffolding solutions provider in regional Western Australia. We leverage over 25 years of scaffolding design, engineering and construction experience to meet our clients every need.

Through GHS Solutions accredited system of work, certified to ISO9001:2004, we provide quality controlled, cost effective solutions in a safe and efficient manner. Scaffolding is recognised across all industries as a high risk activity. GHS Solutions has an excellent safety record, which is testament to the controlled working environments achieved through our policies and procedures externally certified to AS/NZS4801:2001.

GHS recruits employees based on cultural fit, ability to work in a team environment, attitude to safety and skills and experience, through a rigorous recruitment process. Ongoing training and development of GHS Solutions employees is an important ingredient for our success within the mining, oil & gas and construction sectors.

Through excellent open communication, transparency, high reporting standards, and a professional workforce, GHS Solutions can be relied upon to meet your all your scaffolding requirements.
